

# Children's Defense Fund Child Poverty in America 2014: State Analysis

September 2015

State data released by the U.S. Census Bureau on September 17, 2015 reveal that child poverty in 2014 remains at record high levels in the states. Children are the poorest age group, and the poorest are children of color and those under age six. Only two states (Kentucky and West Virginia) had White, non-Hispanic child poverty rates higher than 20 percent, whereas only one state (Hawaii) had Black child poverty rates lower than 20 percent. Only 10 states experienced statistically significant decreases in child poverty rates between 2013 and 2014. In order to end child poverty, we must ensure all parents and caregivers have the resources to support and nurture their children: jobs with livable wages, affordable high-quality child care, supports for working families like the Earned Income Tax Credit (EITC) and the Child Tax Credit (CTC), and safety nets for basic needs like nutrition and housing assistance.

## Only 10 States Experienced Statistically Significant Drops in Child Poverty Since 2013

Ten states saw statistically significant decreases in child poverty, and in seven of them the decrease was less than 10 percent. Three states (Alaska, New Hampshire and North Dakota) saw statistically significant increases, and all increases were above 20 percent.

## Child Poverty Rates in 2014

Child poverty ranges widely from state to state. In 2014, poverty rates for children ranged from 12.8 percent in Wyoming to 29.5 percent in New Mexico, meaning that a child in New Mexico was more than twice as likely to be poor as a child in Wyoming. In 10 states and the District of Columbia more than 25 percent of children were poor. Poverty is defined as an annual income below \$24,230 for the average family of four—\$2,019 a month, \$466 a week or \$66 a day.

## Young Children Continue to Suffer from Higher Poverty Rates

In 2014, poverty rates for children under six years of age ranged from 13.8 percent in Hawaii to 33.8 percent in New Mexico. Except Hawaii and the District of Columbia, in all other states poverty in children under age six was higher than among all children under age 18. In 20 states, over 25 percent of children under age six — more than one in four — lived in poverty. In eight states, almost three in ten children under age six live in poverty. Only four states had fewer than 15 percent of young children in poverty.

## Child Poverty by Race/Ethnicity

Across the states, children of color continue to suffer disproportionately from poverty—with the youngest children of color experiencing the highest rates of poverty.

### Black Children

- In 2014, poverty rates for Black children ranged from 17.2 percent in Hawaii to 51 percent in Alaska. In almost half of the states (22), 40 percent or more of Black children were poor. Only one state – Hawaii – has less than 20 percent of Black children living in poverty.
