Children's Defense Fund

Right now Republican Senators are working behind closed doors on their own version of the terrible American Health Care Act (AHCA) that would rip away health coverage from 23 million Americans. Thirty-seven million children benefit from Medicaid, including 40 percent of all children with special health care needs. Medicaid also covers more than 40 percent of all births. America's future depends on the health of our young and Medicaid works for children. The Senate bill will end Medicaid as we know it and put coverage for all these children at risk. Urge your Senators to reject any structural changes and caps to Medicaid.

and #KeepKidsCovered**

Here is What You Can Say

I am a concerned constituent from _____. I urge Senator _____ to Keep Kids Covered and reject any Senate Health Bill that fails to preserve and protect Medicaid as we know it and increases the number of uninsured children in our state and across the country. There is no way to design a Medicaid "per capita cap" or block grant that won't harm children (and other generations too). At a time when 95% of children have health coverage, we must not move backwards.
